

Have your say

Technology Enabled Care Solutions (TECS) describes a range of health and care technologies.

It includes technology that assists people with disabilities and mobility needs, and it provides an adapted solution to help people to remain independent.

We would like to find out:

- If you are aware of technology/assistive technology
- What the barriers are to using technology/assistive technology
- If you use technology or assistive technology and how they have helped you or the people you care for

If you would like to take part in our survey, visit <https://yourseftonyoursay.sefton.gov.uk/> from **Monday 12th September** and go to the Technology Enabled Care Solutions/Assistive Technology Survey.

You can also scan the QR code to the right using a mobile phone.
