

Crosby Town Centre Regeneration

We (Sefton Council) have big plans for Crosby Town Centre, and we want to hear your views about.

- why you visit Crosby
- how you travel to Crosby
- what your thoughts are on our future plans for Crosby.

We want to improve Crosby town centre and make it easier to get to.

This will help the shops and businesses and the local community.

We want to share our ideas about what we plan to develop. And ask for your ideas.

Our Ideas include

On the Green Car Park.

We want to change the current car park into a new building. The building will have a new library, healthcare services and apartments for people to live in.

Other Car Parks (called Cooksland and Allengate).

Because we want to build on the current car park, we need to make the other car parks in the town centre better so people can still park in the town centre.

Double mini roundabout

Make the double mini roundabout easier to use for cars and for people walking and cycling.

You can tell us what you think in different ways.

Online

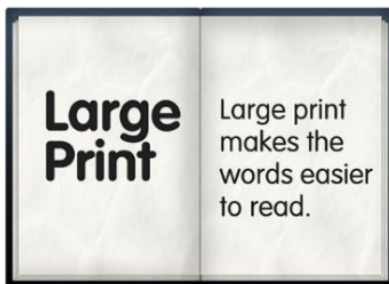

You can fill in an online form at Your Sefton Your Say and search for Crosby Town Centre Regeneration.

You can **ring** the council on

0345 140 0845

Someone from the team will call you back to take your views.

We have different formats available please email us:

regen@sefton.gov.uk

or call us to arrange giving your feedback in another way.

We have looked at a previous consultation from 2014 – 2015 which was used for the Crosby Investment Strategy.

It said the Green car park would be a good site to develop.

We are now looking at how we can do what we said we would do.

You can find more information about the Crosby Investment Strategy here:

[Crosby Investment Strategy \(sefton.gov.uk\)](http://sefton.gov.uk)

Or search on Sefton Council's website for Crosby Investment Strategy.

The Council has declared a climate emergency and is changing the way we do things. This includes changing how we travel which is key to tackling the climate emergency.

We want to make Crosby Town Centre easier to get to for people.

We want to improve the public spaces around Crosby Town Centre. This will encourage people to travel in different ways. This could such as walking, cycling and using the buses.

Our plans also include putting spaces for electric charging of vehicles in the car parks.

You can find out more by clicking here [Climate Emergency](#)

Or going to the Sefton Council website and searching for Climate Emergency.

Our vision for Crosby is that it is accessible for everyone and a Connected Crosby.

Sefton Council have put a bid into the Government's Levelling Up Fund. This is funding available to pay for community changes.

We have asked for £19.2 million to help us with our plans for Crosby.

We do not know whether the Government will give us this money yet. We will find out about this later this year (2021).

If we don't get the money from the Government, we will keep looking for other ways to pay for this work.

Because it is an important part of making Crosby better.

We want to listen to all your views and thoughts on this development.

Your ideas will be considered before a final design is agreed.

You can provide an email address to receive a copy of your answers.

This email address is discarded and not kept by Sefton.

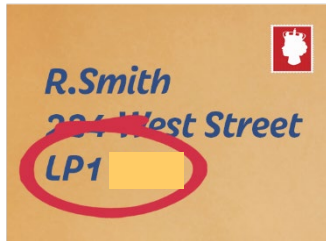

We will continue to ask for your views and opinions about the designs for the new building and the area around it.

At the end of the survey there are some questions about you. These are called Equalities Monitoring questions.

You do not have to answer these questions. We must ask them. They are there to show we have reached everyone.

We have asked for the first part of your postcode.

This is to help us understand where people visiting Crosby are travelling from.
